BUCKIN' EPILEPSY  
Family Farm Fun Day

I grew up as a completely “normal” kid. I never knew about or tried to understand what epilepsy was. All of this changed when I was sixteen years old when I was diagnosed with epilepsy.

In March 2014 I suffered a pretty severe grand mal at work. Since that date, my seizures have been uncontrolled. I experience 30-40 myoclonic jerks per day, 2 or 3 grand mal seizures per month, and have begun to experience absence seizures, which is something I never suffered from previously.

Working with my neurologist we have attempted numerous medications to help reduce the severity and frequency of my seizures. Unfortunately, we haven't yet been able to control them

My wife Brittany and I moved to Grey County in 2017. She suggested we look into local events dedicated to epilepsy awareness. It soon became clear that there wasn't any. We then took the initiative to research and reach out to Epilepsy Canada in hopes to raise awareness and create an annual event in Grey and Bruce county. We created Grey/Bruce Epilepsy Awareness on various social media platforms in hopes that our posts would encourage and inspire others, like myself, who are dealing with epilepsy.

*"Epilepsy Canada is near and dear to my heart because it is dedicated to finding a cure through research. I believe that funding research for new medications, so that fewer people suffer from uncontrolled seizures is a fantastic mission."*

# PAST SUCCESS

The last 30 months have been a whirlwind for all of us. As we start to approach something of a normalcy on the horizon, we are embracing change.

What initially started 2 years ago as an effort to raise awareness and funds for epilepsy research, has since translated to overwhelming support from the epilepsy community, and our local region as well. Our epilepsy family is growing. We are raising more awareness for this invisible illness. Britt and I are forever grateful for this.

Just as our epilepsy family is growing, our household is growing as well. We welcomed two twin girls in November. Our goal is to also keep our now three children as involved with this endeavor as possible.

Because of this, we have decided to transition from our Golf Tournament and our previous two successful, and absolutely wonderful years at Legacy Ridge Golf Course. We wanted to make this year fun for all ages.

We are absolutely thrilled that our Grey/Bruce Epilepsy Golf Classic has raised almost \$40,000 since 2019 towards epilepsy research! We are hoping to keep this fundraising momentum going with our new event: Buckin' Epilepsy a Family Fun Farm Day.

This August 6th, we will be again co-hosting with Epilepsy Canada at Glendale farms for a day filled with numerous activities.

**BUCKIN' EPILEPSY**  
Family Farm Fun Day

360,000 Canadians live with epilepsy and over one million loved ones deal with the consequences daily.

This event is an incredible opportunity for any family-focused business in the Grey/Bruce Area to get involved with our grassroots community effort of raising awareness and funds for epilepsy.

Our Family Farm Fun Day cannot happen without the generous support of you, our community sponsor!
