OUR EVENT

THE TOURNAMENT

Our Inaugural Annual Tournament will be held on Monday, August 15th, 2022 at North Granite Ridge, right in the heart of Muskoka, Port Sydney, Ontario.

Set among 320 acres of quiet forest and stunning natural terrain in the heart of Muskoka, you'll discover North Granite Ridge Golf Course. Our 18 hole championship course offers privacy, tranquility and incredible long-range vistas that only unique topography of Muskoka can provide. Wildlife abounds. It would be a rarity to play a round of golf without spotting a family of deer.

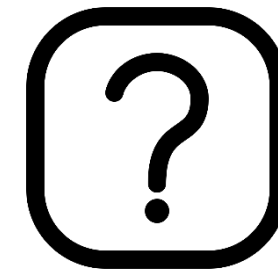

Challenging enough for professionals yet friendly to all levels of golfers, from the moment you arrive you will receive the impeccable service and courteous hospitality that North Granite Ridge prides itself upon.

MONDAY AUGUST 15TH 2022

OUR CAUSE

Approximately 360,000 Canadians live with epilepsy (about 1% of the population) and 65 million people worldwide.

According to recent estimates, in up to 50% of patients diagnosed with epilepsy, the cause is unknown.

30% of people who are diagnosed will have drug-resistant epilepsy.

Epilepsy affects more people than multiple sclerosis, cerebral palsy, and Parkinson's combined - yet receives fewer federal dollars per patient than each of these.

Our mission is clear:
Fund Research. Find a Cure.

SUPPORTING RESEARCH & AWARENESS

Epilepsy Canada is a registered Canadian charity dedicated to positively affecting the lives of those living with epilepsy. Its sole mandate is to raise monies for epilepsy research with an objective of finding a cure.

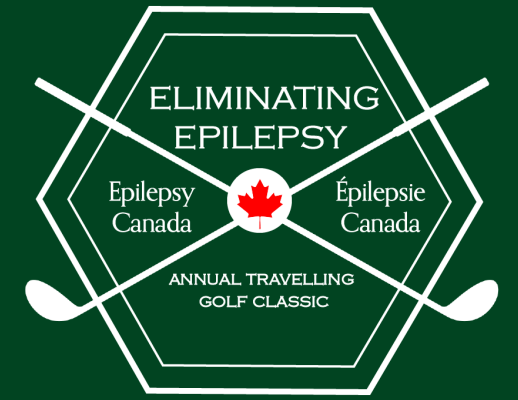

Founded in 1966, the organization depends on donor and volunteer support for the continued development and delivery of its research grant programs. It demonstrates the need for research by highlighting key issues related to those whose seizures cannot be controlled through existing medication and treatments and the tragic cases of SUDEP (Sudden Unexplained Death from Epilepsy). Through its active financial support of epilepsy research, it strives to help the Canadian neurology community find a cure for epilepsy.
